6. YOUR SUMMARY CARE RECORD

Last updated Feb 25

To be reviewed Jan 26

Your summary care record is an electronic record of your healthcare history (and other relevant personal information) held on a national healthcare records database provided and facilitated by NHS England.

This record may be shared with other healthcare professionals and additions to this record may also be made by relevant healthcare professionals and organisations involved in your direct healthcare.

You may have the right to demand that this record is not shared with anyone who is not involved in the provision of your direct healthcare. If you wish to enquire further as to your rights in respect of not sharing information on this record then please contact the Data Controller.

To find out more about the wider use of confidential personal information and to register your choice to opt out if you do not want your data to be used in this way, please visit www.nhs.uk/my-data-choice.

Note if you do choose to opt out, you can still consent to your data being used for specific purposes. However, if you are happy with this use of information you do not need to do anything. You may however change your choice at any time.

7. WHO WE MAY PROVIDE YOUR PERSONAL INFORMATION TO, AND WHY

Whenever you use a health or care service, such as attending the Urgent Treatment Centre, Accident & Emergency or using Community Care Services, important information about you is collected to help ensure you get the best possible care and treatment. This information may be passed to other approved organisations where there is a legal basis, to help with planning services, improving care, research into developing new treatments and preventing illness. All of this helps in providing better care to you and your family and future generations. However, as explained in this privacy notice, confidential information about your health and care is only used in this way where allowed by law and would never be used for any other purpose without your clear and explicit consent.

We may pass your personal information on to the following people or organisations, because these organisations may require your information to assist them in the provision of your direct healthcare needs. It, therefore, may be important for them to be able to access your information in order to ensure they may properly deliver their services to you:

- A. Hospital professionals (such as doctors, consultants, nurses, etc.);
- B. Other GPs/Doctors;
- C. Pharmacists;
- D. Nurses and other healthcare professionals;
- E. Dentists;
- F. Any other person that is involved in providing services related to your general healthcare, including mental health professionals.

8. OTHER PEOPLE WHO WE PROVIDE YOUR INFORMATION TO

- A. Commissioners;
- B. Integrated Care Board;
- C. Local authorities;
- D. Community health services;
- E. For the purposes of complying with the law e.g. Police, Solicitors, Insurance Companies;
- F. Anyone you have given your consent to, to view or receive your record, or part of your record. **Please note, if you give another person or organisation consent to access your record we will need to contact you to verify your consent before we release that record. It is important that you are clear and understand how much and what aspects of, your record you give consent to be disclosed.**
- G. **Data Extraction by the Integrated Care Board** – the clinical commissioning group at times extracts medical information about you, but the information we pass to them via our computer systems **cannot identify you to them**. This information only refers to you by way of a code that only your practice can identify (it is pseudo-anonymised). This therefore protects you from anyone who may have access to this information at the Clinical Commissioning Group from **ever** identifying you as a result of seeing the medical information and we will **never** give them the information that would enable them to do this.

There are good reasons why the Integrated Care Board may require this pseudo-anonymised information, these are as follows:

- To assist in analysing current health services and proposals for developing future services.
- To develop risk stratification models to help GP's to identify and support patients with long term conditions and to help to prevent un-planned hospital admissions or reduce the risk of certain diseases developing, such as diabetes.
- Using risk stratification to help the CCG to understand the health needs of the local population in order to plan and commission the right services.

Further details on how the Integrated Care Board (formerly NHS East and North Hertfordshire CCG) uses information to support their roles and responsibilities can be found on the CCG website: <http://www.enhertscg.nhs.uk/how-we-use-information-about-you-fair-processing-notice>
